

## **Customer Information – Coronavirus (COVID-19)**

SDK Logistics AB is closely monitoring the COVID-19 situation and this together with our local partners and networks all over Europe. The focus from our point-of-view is protecting our employees and customers. SDK Logistics has implemented guidelines to protect health and safety.

In many countries the various governments have established border-/healthy controls. The impact is longer delays at the borders and with expected longer leadtimes.

The many initiatives - both nationally and internationally - can make the transport and logistic chain more difficult and of course we at SDK Logistics fully support everything that could be a possible help/prevention in this time and situation. We want to make sure that we operate according to the present situation and in close cooperation/dialogue with all the partners involved to ensure an optimal flow as possible. However we expect the situation to result in general delays, extended transit times and with risk for increased transports-costs which is out of our control.

We would like to emphasize, of course, that we are working based on current guidelines from authorities, whether in Sweden and/or abroad. This is an extraordinary situation that is changing from day to day.

We are doing the utmost to meet the requirements of our customers in this specific situation and we will keep you further up-dated via our homepage.

If you have questions about your import and/or export please don't hesitate to contact your usual contact person at SDK Logistics.
